Sourcengine’s E-Commerce Marketplace API + Integrations

Digitalizing the supply chain is crucial for any OEM, ODM, or EMS. Studies show that companies which stick to a traditional analog supply chain system may run the risk of supply chain disruption.

Sourcengine’s API Integrations are here to help.
Sourcengine API
Work faster, not harder

Sourcengine's API allows companies to run our e-commerce marketplace natively in a company’s own ERP system.

Receive information on:
- 550+ million part numbers
- Pricing and availability
- Lifecycle, compliance,
  technical details
- Alternates
- Real-time data with live offers

3,000+ traceable vendors

Sourcengine's API

Customer ERP / other systems
Orbweaver Integration
ERP + other system(s)

If your company needs help with data transmission, our partnership with Orbweaver is the answer. Orbweaver connects our API to your ERP or other system.

Orbweaver offers three levels of integration built off of Connect:

- **Inform**: A Microsoft Excel-based interface for the import and export of Sourcengine’s data
- **Advance**: A web-based interface based on Connect that allows a full range of complex actions and reports
- **Custom**: An integration built specifically for your ERP or other system(s), can run our BOM natively on a daily basis, generating up to 50,000 queries to get regular updates on live offers

EMS companies in need of updating the traditional RFQ process will be interested in CalcuQuote’s solution. Now, there is no longer a need for endless RFQs to complete an order.

With CalcuQuote, customers can:

- Manage all RFQ processes within one user-friendly dashboard
- Receive up-to-date inventory levels via Sourcengine’s API data
- Best view pricing and delivery times
- Receive RFQ responses directly to the user dashboard
Ultra Librarian Integration
Benefits for Engineers

Design engineers will be eager to learn about our integration with Ultra Librarian, the provider of the world’s largest PCB CAD library.

With Ultra Librarian, engineers can:

- Integrate Sourcengine’s API or OrCad
- See pricing and availability data
- View parametric data and data sheets on components
- Check for alternates on a design when needed

Luminovo’s Integration
Benefits for EMS Providers

EMS providers can use Luminovo’s LumiQuote RFQ software to streamline and expedite their quoting and sourcing processes. It is an ideal solution for companies operating in the high mix, low volume sector.

With LumiQuote, EMS buyers can:

- Access real-time pricing, availability, and lead time information on thousands of parts
- Browse component listings from more than 3,000 fully vetted suppliers
- Optimize sourcing with automated compliance and alternates data
